TUBULAR ACCESSORIES

For more than a century, U. S. Steel has been dedicated to providing the highest quality products and services, including industry-leading tubular products and OCTG services. The latest outgrowth of this commitment is our new premium threading and tubular accessories facility. Strategically located in Houston, Texas in close proximity to our customers, the space provides 150 acres of secure storage with 24-hour access, 365 days a year. U. S. Steel's premium threading and tubular accessories facility offers extensive API and proprietary threading and finishing services, as well as a broad selection of accessories to accommodate your most challenging wells.

U. S. Steel Oilwell Services

API & PREMIUM THREADING

U. S. Steel Oilwell Services specializes in complex, CNC threading of full-length OCTG and accessories. We provide API and premium threading ranging in size from 2 3/8" to 20" outside diameters. Tubing and casing threading services encompass bucking, torque turn, saw cutting and full-length drift. All services can be performed at the state-of-the-art U. S. Steel Oilwell Services facility in Houston, Texas.

In addition, U. S. Steel offers a variety of ancillary threading services, including:

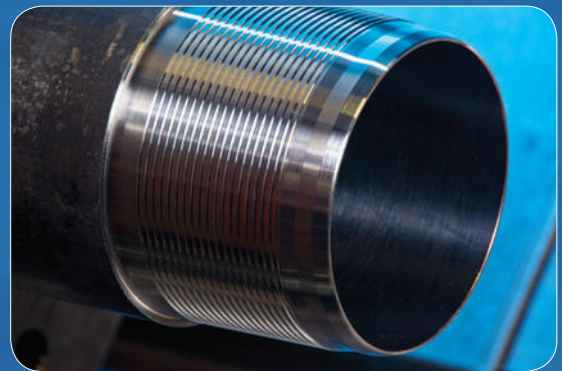

- Threading for API connections
- Premium threading for proprietary connections
- Sand blasting
- Phosphating
- Painting
- End finishing
- Turning and boring

INSPECTION SERVICES

U. S. Steel provides a wide range of tubular inspection services. These non-destructive testing services can be performed at the U. S. Steel Oilwell Services facility in Houston, Texas.

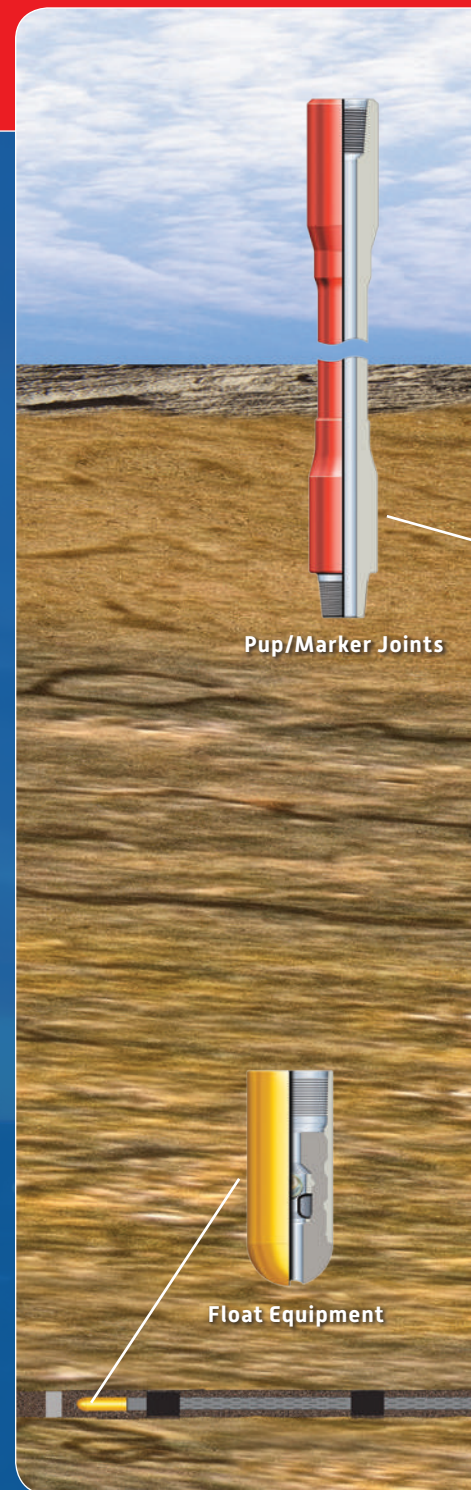

- Full-body ultrasonic inspection
- Special end-area inspection
- Full-body drift
- Hydrostatic testing
- Weld-line inspection
- Electromagnetic inspection
- Visual inspection
- Dye-penetrant inspection
